Guildmore – Building complete at Cricketers House

Works at Cricketers House are now complete!

The Guildmore team has now completed the construction project consisting a total of 10 new build apartments made up of a variety of 1, 2, 3 bed apartments, designated as private sale units.

Guildmore would like to take this opportunity to thank local residents and the community for their understanding and patience during the construction period. It has been a hard and often uniquely challenging job, but anything and everything is possible with a winning combination of motivated staff, and a skilled local workforce.

Cricketers House is a development of just 10 brand new apartments set within a striking Neo-Georgian building which features stone window surrounds and extensive balconies. The project is brought to life with a specification that is contemporary and stylish with day to day functionality very much in mind. A sense of luxury is felt from the moment one enters the private parking area and walks into the entrance foyer. A passenger lift to the upper levels is provided and a substantial car parking area which is privately controlled. The building is located opposite what is believed to be, the world's oldest continuously used cricket green.

The development is exceptionally well positioned for the Town Centre, bus & tram routes, whilst also being convenient to reach train and underground stations at nearby Mitcham Junction and Colliers Wood.
